Summary

It is my pleasure to introduce myself as KWIZERA Omer. Currently, I am enrolled in African Leadership University and the University of Rwanda College of Science and Technology, where I am studying architecture. Aside from that, I have a Diploma A2 in Mathematics, Physics, and Chemistry from Groupe scolaire St. Jerome Janja, where I graduated with honors after scoring 100% on the national exam.

The study of urbanization and climate change through sustainable design methodologies is something I am passionate about.

In addition to my experience with Computer Assisted Diagramming (CAD), I have knowledge of Adobe Illustrator, Adobe Photoshop and ArchiCAD.

The art I create, the visualization I do, and the problem-solving skills I possess will help me create a world without rural areas one day. It is planned that all rural areas will be transformed into cities and that their surroundings will be designed to benefit both their health and sustainability.

Experience

Volunteer
Climate Change Writers
Sep 2022 - Present (10 months)

Education

The African Leadership University
Bachelor of Engineering - BE, Computer Software Engineering
May 2022 - Dec 2025

University of Rwanda
Bachelor of Architecture - BArch, Architecture
Apr 2021 - Mar 2025

Licenses & Certifications
